

Webdeveloper (Asp.net, C#, HTML)

Your profile

Expertise and critical

You are an expert in complex programming and experienced in web applications. Besides that you are a team player. You are able to make judgments in responsible way. Having a healthy proportion of self-criticism and knowing the difference between a good and a half job.

Involved and creative

You are constantly searching for new developments and solutions. Giving feedback at the right moment is essential. You are willing to discuss any issue or insecurity with your colleagues or manager to solve it together. Relevant input or alternatives for the projects you work on are always welcome.

Organized and informed

Organizing and documenting your work is a prior for UCD. You are able to deliver a functional design, sometimes put together on a basis of little information. Being in a pragmatic manner is a must. Flexibility towards one another and towards your projects is essential within the company. It must be challengeable to always be up to date in this rapidly changing market.
